CURRENT RESEARCH INTEREST

Computer Vision, Multi-modal learning, LLMs, Foundational models, Scene Understanding, Domain Adaptation, Gait Recognition, Person Re-ID

EDUCATION

Johns Hopkins University

Baltimore, USA

Ph.D. in Computer Science (Advisor: Prof. Rama Chellappa)

2022 – current

M.S.E in Computer Science (GPA: 4.0/4.0)

Birla Institute of Technology and Science, Pilani

Pilani, India

B.E. in Computer Science (GPA: 9.58/10)

2018 – 2022

Thesis: Temporal self-similarity for Unsupervised Gait Recognition.

EXPERIENCE

Research Intern

May 2024 – present

SRI International. Mentor: Dr. Anirban Roy

Teaching Assistantship

Aug. 2023 – Dec. 2023

Machine Perception, JHU. Mentor: Prof. Rama Chellappa

Research Assistant

May 2021 – June 2022

CRCV Lab, University of Central Florida, Mentor: Dr. Yogesh S Rawat

Research Intern

May 2020 – July 2020

Indian Institute of Remote Sensing, ISRO. Mentor: Dr. Rekha Anandrao

PUBLICATIONS

- *Ayush Gupta*, Anirban Roy, Rama Chellappa, Nathaniel D. Bastian, Alvaro Velasquez, Susmit Jha. “**TOGA: Temporally Grounded Open-Ended Video QA with Weak Supervision**” under submission.

- Basudha Pal, *Ayush Gupta*, Vishal Patel “**EchoSAM: Predicting Ejection Fraction using Segmentation Guided Vision Transformers**” under submission.
- *Ayush Gupta*, Alexander Matasa, Shruti Vyas, Yogesh S Rawat “**GaitZero: Temporal Self-similarity for Unsupervised Gait Recognition**” under submission.
- *Ayush Gupta**, Ashrya Agrawal*, Poonam Goyal, Navneet Goyal “**Visually Guided Knowledge selection for Video Captioning**” under submission.

PROJECTS

- Assured Neuro Symbolic Learning and Reasoning (ANSR)** DARPA Program
- Developed a framework for reasoning on complex QA pairs with temporal grounding assurance
 - Focus on open-vocabulary question answering with temporal grounding abilities in unconstrained videos
 - Utilized foundational vision encoders like CLIP and open source LLMs like Mistral and LLaMA
- Biometrics Recognition and Identification at Altitude and Range (BRIAR)** IARPA program
- Implemented a multi-view gait recognition framework on turbulent data captured from upto 1000m
 - Improved gait recognition under occlusion scenarios
 - Fusing this approach with other modalities like face and body to identify subjects
 - Algorithms integrated into deployable IARPA system pipeline
- Undergraduate Thesis: Vision Based Gait Recognition** CRCV Lab, University of Central Florida
- Developed approaches for unsupervised gait recognition using RGB datasets like FVG and CASIA-B
 - Utilized self-similarity matrices for capturing gait patterns using Transformers
 - Implemented unsupervised contrastive learning losses to train the model
- Natural Language Video Description Generation** ADAPT Lab, BITS Pilani
- Designed a framework for generating natural language descriptions of videos of real scenes
 - Utilized external object detectors to extract generalized nouns for the caption
 - Used external knowledge bases to supplement the captioning model with specialized versions of the nouns.
- CLARIN COVID-19 Disinformation Hackathon** LT Group, Universität Hamburg
- Developed models for automatic fact-checking
 - Used news crawling APIs and existing datasets like EUvsDisinfo and LIAR Plus to verify a claim.
- Landcover Classification using Satellite Imaging** IIRS, ISRO
- Used Google Earth Engine to classify satellite image pixels into landcover categories
 - Implemented the Spectral Angle Mapper, SVMs and K-Means learning algorithms
- Transfer Learning in Semantic Segmentation for Autonomous Vehicles** Course Project, Computer Vision
- Collected a dataset, JHUSStreet, of street images from a car and pedestrian perspective around Baltimore.
 - Trained and evaluated the DeepLabV3 model on the segmentation task on JHUSStreet dataset.
- Adversarial Attacks and Defences on CNNs** Course Project, Machine Perception
- Implemented FGSM, Noise and Carlini Wagner attacks on CNNs
 - Implemented Adversarial training to defend against these attacks.

REVIEWING EXPERIENCE

CVPR 2024, NeurIPS 2024, WACV 2025

AWARDS AND HONORS

- Merit Scholarship for being in **top 2% of students at BITS Pilani** consistently since Aug. 2018
- Recipient of **DAAD-WISE 2021 scholarship** for a summer project in Universität Hamburg, Germany
- State Rank 1 in National Science and Talent Search Examination (NSTSE) 2017

TECHNICAL SKILLS

Languages: Python, C, Matlab, Java.

Frameworks: PyTorch, Tensorflow, Keras.

RELEVANT COURSEWORKS

Computer Vision, Artificial Intelligence, Machine Perception, Machine Intelligence, Neural Networks and Fuzzy Logic, Digital Image Processing, Data Structures and Algorithms, Computer Programming, Probability and Statistics, Multi-Variable Calculus, Linear Algebra and Complex Analysis, Differential Equations, Database Systems, Object Oriented Programming

VOLUNTEERING

Project Lead: Participatory Community Development, Nirmaan Organization May 2019 - Dec. 2019

- Led a team of 10+ members for scouting infrastructural deficiencies in villages nearby Pilani
- Worked on building a rainwater harvesting system and a solar light in Baas Village.
